LIST OF ELIGIBLE X-rays systems and CAD/AI software for TB Screening

This is a consolidated list of X-rays systems compatible with CAD/AI software for TB Screening and CAD/AI software compatible with X-ray systems for TB Screening compliant with The Global Fund Quality Assurance Policy. It is developed as a tool to assist Principal Recipients (PR) of Global Fund grants to identify products that meet the requirements of The Global Fund.

Important Note

This list may be used by Principal Recipients (PRs) of The Global Fund grants for the procurement of

- X-ray systems compatible with CAD/AI software for TB Screening and
- CAD/AI software compatible with X-ray systems for TB Screening.

Please note that the list is not designed to replace any applicable and legally required procurement processes. The Global Fund requires its grant recipients to comply with applicable procurement laws and provides the list only for the identification of products/manufacturers that comply with the Global Fund's requirements.

The list is non exhaustive. PRs can procure products not listed below as long as the product selected is compliant with the Global Fund's QA Policy for Medical Devices (including In-Vitro Diagnostics) and Core PPE at https://www.theglobalfund.org/en/sourcing-management/quality-assurance/medical-devices-and-core-personal-protective-equipment/ and Guide to Global Fund Policies on Procurement and Supply Management of Health Products at https://www.theglobalfund.org/en/sourcing-management/updates/2021-06-21-updated-guide-to-global-fund-policies-on-procurement-and-supply-management/).

This list is updated on a regular basis and users should use the most recent version on the website when conducting procurement.
